

Job Specification – Senior Developer

Location: Winnersh Triangle, near Reading

Job type: Full Time

Job title: Senior Developer

Reporting into: Development Manager

Keywords: C#, ASP.NET MVC, ELK

THE COMPANY

Artesian, a market leading name in Sales & Risk intelligence software is looking for a Senior Developer to join their growing in-house development team.

Artesian is a privately held, profitable company with around 200 large enterprise customers equating to 30,000 subscribers. Our customer satisfaction is 99.1% and retention rates are some of the best in the SaaS industry.

We are a talented team of 40 employees, headquartered near Reading Berkshire, with an aim to double in size in the next two years and we are seeking a junior developer to help build the platform that underpins this growth. Check us out at <http://artesian.co>

ROLE PROFILE

This is a great opportunity for a .NET Developer who has a good University degree in Software Engineering, Computer Science or another STEM related subject. You will join a team of expert Developers working with the latest Microsoft development toolkit building enterprise scale web applications used by thousands of people across the UK. You will work as part of a development team of 15 where you will be involved in all aspects of the development lifecycle following an Agile development methodology.

Tools: Latest Visual Studio, ReSharper, Subversion, Git, TeamCity, JIRA

Programming languages/frameworks: C#, .NET, ASP.NET, MVC, JQuery, Angular

Technologies: Elastic Search, Lucene.NET, SQL Server, Xamarin, Kibana, Logstash

KEY ATTRIBUTES:

- Degree educated (or equivalent) programming exposure, at least 5 years solid experience of C#.NET/ASP.NET is essential, excellent opportunities to move into team-leading and technical management
- Knowledge and experience of modern systems aimed at anti-money laundering, know-your-customer and financial risk, exposure to large financial data-providers like Experian and D&B a significant plus. Also, experience of systems that span geographies and languages a bonus.
- Experience in one or more of: "Big Data", Data-warehousing, Distributed Component Communication (service buses, messaging, Akka.NET etc)
- A keen interest in and passion for programming, excellent OO knowledge, enthusiasm for modern design patterns like DI and a desire to design and build architecturally strong solutions
- Good general knowledge of relational databases, the social media landscape, SaaS, business intelligence and analytics landscape. Exposure to business applications, with emphasis on CRM/Sales Intelligence with SaaS style deployment characteristics
- Team oriented, tenacity and enthusiasm for quality
- Ideally a resident of the Thames Valley, i.e. roughly within the Reading-Slough-Guildford-Basingstoke quadrangle or moving here.
- The company are proud to invest in professional development of team members and offer successful applicants internal and external training courses as well as regular reviews of performance and goals.

In addition to a competitive salary, our benefits package includes; share options, health cover discounts, 25 days holiday, free food & hot drinks, active social-club and flexible working conditions.
